<b>Product Material</b>	Polyester
<b>Packaging</b>	Shoe Box
<b>Storage Instructions</b>	Store in a dry place protect against high temperatures and uv rays exposure, once removed from the original packaging, it can be stored in a cupboard.

## DESCRIPTION

---

Extend the life of your Ice Diamond 501 boots with our Sherpa Boot Liner 502, specially designed to carry sweat away from the skin. Alongside these advanced wicking properties, the liner traps more air so feet are kept warm even in the coldest of temperatures. In addition, a special gripping patch helps keep the liner in place at all times. Order these super-warm boot liners from FlexiTog today.

- Hygienic wicking properties - Sweat is carried to the outside of the liner to keep the foot warm at all times
- Sherpa fleece lining - Traps more air to increase warmth
- Heel Grip - Patch of gripping material on the back of liner to ensure the liner doesn't slip up & down inside the boot. This protects against wear whilst providing additional comfort.
- Manufactured in India
